What's New in the?

You can now perform a markup assist with the command pallet, making it easy to add and manipulate AutoCAD drawings. Enter a new "Markup AutoCAD" tool in your drawing preferences. Markup adds a section with markup information to the drawing. Enter lines and symbols, or type text for improved accuracy, and get feedback about your markup without closing the section. Markup AutoCAD and the Markup dialog window provide tools to automate creation of your own drawing templates. A new video tutorial gives you a quick and concise guide to creating and using drawing templates. It's also available in a new, updated Office manual. Video: AutoCAD 2023: Introducing the new Markup dialog window Saving: Keep your drawings in sync with your code, and reduce the time spent reopening files. Support for Git version control and Wi-Fi connectivity let you collaborate with colleagues across multiple devices. Scan and save PDF files to DWG files, and import models from certain web sites into your drawings. A new On-Screen Display (OSD) option lets you disable unnecessary drawing tools and remain focused on the task at hand. Get the most from AutoCAD, efficiently navigate the menu, and quickly locate the drawing tools you need. The latest drawing tools have new user interfaces. When you work in a multi-pane drawing, you can now navigate between the separate drawing areas without leaving the current one. New drawing templates include charts, plan and vertical dividers, and diagrams. You can now customize the list of commands in the command pallet for faster access. You can now add two or more DWG files to an existing drawing, and insert a pre-existing model in the center of a sheet. In sheet view, right-click on an area of a sheet to select, copy, paste, select all, and more. PowerPoint, Word, Excel, PDF, and Web and Print PDF support let you share data with colleagues and clients.
