

RSS Xpress

RSS Xpress is a free news reader that you can use to read RSS feeds and atoms that you like. RSS Xpress lets you save both RSS feeds and Atom documents locally for offline reading. If you install RSS Xpress, you will be able to read your favorite news online, and offline also. When you enable the RSS Xpress plugin in an existing TextMate bundle, it will overwrite the existing bundle with the same name and all the settings will be retained. But that means you will lose all the customizations that you made while using the original TextMate bundle. If you don't want to lose your customizations just don't install the plugin. There are a few features in RSS Xpress that makes it different from other Atom/RSS readers. You can read your feeds offline (although you have to enable this feature) and you can also edit the feed and save it later on. RSS Xpress can be installed in OS X 10.7 (Lion) and later version. RSS Xpress is a free application and it includes latest versions of both RSS and Atom. The most important problem with Atom readers is that they lack of functionality, RSS Xpress is a simple and easy to use Atom/RSS reader that has most of the functionalities you require. The first thing you will notice about RSS Xpress is the sheer number of options available in it. You can set the location of your RSS feed, what type of feed you wish to subscribe to, whether you want to view/read the feed offline or not and a couple of other options as well. Since I have installed RSS Xpress it also saved a local copy of any updates that I made to my feeds. As you can see in the above screenshot RSS Xpress offers a ton of customization options. In the above screenshot you can see that I selected to view the feed online, saved all updates as well as subscribed to the feed through the "automatically download/read my feeds" feature. The home page of RSS Xpress tells you a lot about the application and what you can do with it. To the left hand side of the application, you have a list of the different types of feeds that you can subscribe to. You can subscribe to feeds, groups of feeds, automated feeds (which will keep a track of your favorite feeds) and comment feeds. You can subscribe to feeds from various sites including Google

I use it every day and have told many people about it. You should add a download feature, so that the user will always have the latest version. Thanks again! Review: I can't even begin to tell you how much I love this program. In my business I subscribe to over 300 RSS feeds to keep up with whats new in our field. I have not found a more time saving, or easier way to do this. You do not have to know RSS or how to use anything you do not even have to be a computer user. I am a single and have 2 kids and this is the best app I have ever used. RSS Xpress 3.0 has been reviewed by the Red Web 1.0 the kind of person who can deal with criticism and the hard truth. It is easy to forget that we need people like that in our lives because I wish I had a "stickler" for a husband. I have always been the kind of person who prefers to mope in silence and wallow in self pity than to confront my problems head on. I find it very sad that the Courts cannot do the job of 09e8f5149f
