Their daughter Abigail was born last year. When their daughter arrived, they were excited to see this new girl, but they quickly realized that Lisa was preggy. She knew something was up when it was time to have a son, but she also felt that something wasn't right with her. When Abigail was about three weeks old, she began to smile at her new mom. Lisa had been wary of smiling with her baby because she believed that the baby wouldn't **smile back** with the camera in front of her. With her daughter's first smile, Lisa learned she was wrong. Now the mom can smile **and video smile** with her daughter. Long ago, Adobe solved this issue by allowing you to apply presets directly from within the software, rather than having to create a file. However, when you activate a preset, the boxes appear in the View Menu and in the History menu, but they don't appear in the Presets window. Now, when you click a preset, the preset box pops up and a menu item pops up, which points to all the presets you have ever applied, including those within the History menu. It would be great if these appear in the context of the Presets window, but you cannot merge them.
